

JsonSerializable

```
graph BT; A["App\Application\Actions\n\ActionError"] --> B[JsonSerializable];
```

A UML class diagram illustrating inheritance. At the bottom is a gray-shaded box representing the class `App\Application\Actions\ActionError`. A blue arrow points vertically upwards from this box to a white box at the top representing the class `JsonSerializable`. This indicates that `App\Application\Actions\ActionError` inherits from `JsonSerializable`.

App\Application\Actions
\ActionError
